- 22** *Students' own comparisons. Allow the use of students' native tongue if necessary, and then help them express their ideas in English.*

For Example:

Chickens don't eat hay, but all the other farm animals eat it. Sheep and goats eat similar things, but sheep also eat weeds. Goats can eat anything, even paper, but it's not good for them.

Donkeys eat fruit and carrots like chickens and rabbits, but they also eat woody plants and tree bark.

Chickens are the only animals that eat insects.
